Professional Summary

I am a software engineer with front-end experience, obsessed with designing and building exceptional, high-quality, and efficient websites and applications. Keep my skills updated and learn new technologies.

Education

Bachelor of Computer Science, Mansoura University.   2016 – 2020
                                                                        Mansoura

Coursework: Data Structures/Algorithms, Data Science, Artificial Intelligence, Discrete Math, Statistics/Probability, Object-Oriented Programming in C++, Computer System.

Professional Experience

Frontend Developer, Chingu   02/2022 – 04/2022
                                                                        Internship

Built responsive web applications with a remote team using HTML, CSS, JavaScript, and ReactJS. Liaised with Product Owner to identify minimum viable product requirements and clearly defined feature sets into user stories for individual team members. Developed in an Agile environment, participated in and contributed to sprint retrospectives and planning meetings to meet goals. Played a supportive and leading role in teams, and helped other members with issues that arise in the development process.

Skills

HTML | CSS/SCSS | JavaScript | Typescript | ReactJS | NextJS | Redux | TailwindCSS
Styled-Components | VCS(Git) | NoSQL (MongoDB) | Node.js | Express.js | RESTful-API

Selected Projects

Sonsa

– E-commerce system, order your favorite headphones.
– built with NextJS, Sanity.
– You can see it live

ProHouse

– This site helps you to get all the information about real estate in the area and see the basic information.
– built with NextJs, Axios, chakra-ui.
– You can see it **live**

Pizza Hot

– This site, order your Favorite pizza we promise you'll enjoy every sweet moment to find your favorite eat what you love, and save yourself time.
– built with NextJS, Typescript, sanity, Styled-Components.
– You can see it **live**
